

Isaac Jung

Chino Hills, CA 91709 | iwjung@andrew.cmu.edu | (909) 536-8886 | linkedin.com/in/isaacwjung

EDUCATION

Carnegie Mellon University

August 2025 - Present

Bachelor of Science in Statistics and Machine Learning

Pittsburgh, PA

Relevant Courses: Calculus in 3-Dimensions, Fundamentals of Programming, Methods for Statistics and Data Science, Concepts of Mathematics, Reasoning with Data, Statistics of Sports Betting, Microeconomics

WORK EXPERIENCE

Carnegie Mellon University

March 2026 – May 2026

Undergraduate Research Assistant, LLM Safety & Benchmarking

Pittsburgh, PA

- Evaluated 5,000+ adversarial prompts across 50 LLM safety benchmarks for alignment and misuse risk
- Assessed robustness of current AI safety evaluation methods to identify gaps in automated risk detection
- Flagged recurring failure patterns and edge cases to optimize benchmark design and model evaluation protocols

Business Technology Group

January 2026 – Present

Data Analyst

Pittsburgh, PA

- Developed predictive machine learning models to analyze product performance and user behavior datasets
- Built Python-based data visualizations translating complex statistical analysis for engineering and business teams
- Utilized data cleaning techniques on raw unstructured data to ensure high-fidelity reporting pipelines

Carnegie Mellon University

May 2026 – Present

Mathematics Research Fellow

Pittsburgh, PA

- Conducted 10-week research under Richard Statman on combinatorial logic and functional programming
- Collaborated in a research cohort to develop novel proof-based approaches to problems in combinatorial logic
- Explored advanced computational theory, Lambda calculus reduction techniques, and algorithm optimization

Students Using Data for Social Good

February 2026 – Present

Data Analyst

Pittsburgh, PA

- Analyzed diverse nonprofit program and community datasets using Python and R to uncover actionable insights
- Translated qualitative outcomes into quantitative metrics and data visualizations for grant applications

AfterQuery

April 2026 – Present

AI Content Evaluator

San Francisco, CA

- Reviewed 100+ outputs with structured rubrics to quantify accuracy, reasoning quality, and instruction following
- Classified model errors into structured categories to identify recurring performance gaps and edge cases
- Analyzed model failures to identify common error patterns and guide model improvements

AWARDS & HONORS

Carnegie Mellon MSCF Rotman Trading Competition - 2nd Place (Arbitrage)

September 2025

Competition Participant

Pittsburgh, PA

- Implemented a rules-based arbitrage to accumulate ~\$40K in profits, then worked to preserve gains
- Executed trading opportunities from price discrepancies, making up to \$200K through an arbitrage strategy

John Locke International Essay Competition

August 2023 – August 2024

2-Time Finalist

Oxford, UK

- Analyzed economic, demographic trends, and historical trends, including global population decline
- Finalist in a global contest with ~19,000 entries in 2023 and over 43,000 entries in 2024

John Locke Summer Public Policy Symposium

June 2024 – July 2024

Invited Participant

Princeton, NJ

- Selected from 1,500+ international applicants for a public policy symposium on global economics and trade
- Applied economic reasoning and quantitative analysis to evaluate international trade policy tradeoffs
- Earned Distinction Award for outstanding contributions to discussions on political economy and global markets

SKILLS & INTERESTS

Skills/Languages: Data Analysis, Data Visualization, Python, R, English, Korean, French (Intermediate)

Interests: Statistics, Economics, Philosophy, History, Cello Performance, Public Policy, Poker, Prompt Engineering
